PROJECTS

To-Do List App– Task Management Application 🔗 | [HTML](#), [CSS](#), [JavaScript](#)

Oct 2025

- Developed a responsive and user-friendly To-Do List application to manage daily tasks. Programmed features like add, edit, delete, and mark tasks as completed. Embedded LocalStorage to persist tasks even after browser refresh. Designed a clean and minimal UI using HTML CSS for better user experience. Focused on modular and reusable JavaScript code for scalability.

Simon Says Game 🔗 | [HTML](#), [CSS](#), [JavaScript](#)

Sep 2025

- Created an interactive Simon Says memory game using JavaScript. Implemented random color pattern generation and user input validation. Added score tracking, sound effects, and smooth animations to enhance gameplay. Improved game logic using event listeners and DOM manipulation. Built a fully responsive UI that works on both mobile and desktop.

Airbnb Clone / Airbnb-Like Website 🔗 | [MERN](#)

Dec 2025

- Developed an Airbnb-style property listing website with modern UI and responsive design. Implemented search functionality, filters (location, price, category) and dynamic property cards. Integrated real-time data rendering and modular components for scalable architecture. Added features like property preview, rating display, image gallery, and clean navigation. Incorporated CRUD functionality for property management and booking.

TECHNICAL SKILLS AND INTERESTS

Languages: C/C++, Java, Python, JavaScript

Web Development: HTML, CSS, JavaScript, MongoDB, MySQL,

Technologies/Frameworks: Node.js, Express.js

Developer Tools: Git, Github, Visual Studio Code

Soft Skills: Problem-solving, Communication skills, Teamwork, Adaptability

Achievements

- Solved 100+ problems on LeetCode, strengthening data structures and algorithms skills.
- Maintained a 30-day streak of daily problem solving on LeetCode, demonstrating consistency and discipline.
